Proficient in C#, MySql, and SQL Server and front-end technologies such as HTML, SASS, JavaScript, and Angular. Knowledge of unit tests, performance optimization, and cloud.

Key technologies: C#, .Net, WebForms, MicroServices, Angular, Jquery, AJAX, Git, OOP, HTML, SASS, SQL Server, MySql, Agile methodologies.

Education

Cefet/RJ – Centro federal de educação tecnológica Celso Suckow da fonseca

· Bachelor of Technology – Information Systems
  June 2021 – June 2025

Cefet/RJ – Centro federal de educação tecnológica Celso Suckow da fonseca

· Integrated Technical Course, Tecnologia da Informação
  Jan 2018 - Mar 2021

Skills

- Proficiency in C# and the .Net framework

- Experience with ASP.Net and MVC for building web applications

- Knowledge of web services and web API development using WCF or Web API

- Familiarity with Entity Framework for data access and ORM

- Understanding of software design patterns and best practices

- Experience with unit testing and test-driven development

- Proficiency in HTML, CSS, and JavaScript

- Experience with Angular 2+ for building single-page applications

- Familiarity with TypeScript and its features

- Knowledge of reactive programming using RxJS

- Experience with building and consuming RESTful APIs

- Understanding of front-end build tools such as Webpack

Experiência

FullStack Developer | Viceri Seidor

Feb 2022 – Present (11 months)

· Development of a shipping company`s ERP platform as a .Net and Angular FullStack developer.
· Developed a code generator to accelerate the process of creating the system`s backend.
· Developed reusable Angular components to optimize the development and the quality of the company`s system.
· Worked on maintenance and improvement of the system`s rest API.

I gained valuable experience on large-scale ERP platform and improved mainly my clean code and algorithms techniques.

Internship and Junior FullStack Developer | Bending Bits

Jan 2021 – Feb 2022 (1 year and 1 month)

· Development of an ERP platform for consigned sales as an Asp.Net and JQuery FullStack developer.
· Developed screens using Razor and other tools from Microsoft WebForms
· Worked on maintenance and improvement of the system`s rest API.
· Contributed to creating algorithms for processing data and generating reports for the users.

I gained valuable experience on on large-scale ER and, working on my first real project, leaned a lot about programing and writing algorithms.
